

Learn how you can **contribute** to the **future** of **cancer diagnostics.**

A research study is evaluating biomarkers in blood samples from adults with untreated malignant tumors to assist in future diagnostic test development.

This research study may be an option if you:

- Are 18 years of age or older
- Have an untreated malignancy of one of the following types:
 - Colorectal
 - Kidney/Renal Pelvis
 - Stomach
 - Bladder
 - Pancreatic
 - Ovarian
 - Uterine
 - Liver
 - Esophageal
- Have not undergone chemotherapy and/or radiation therapy within the last 5 years

Other criteria apply. **This study involves one visit lasting about two hours.** Please make sure to discuss with a member of our research staff to ensure this research study is a good fit for you. Financial compensation will also be provided for time and travel.
